## About IT Dojo

IT Dojo, Inc. is a Virginia Beach-based IT and cybersecurity training company with over two decades of experience serving the Department of Defense, Federal Government agencies, and corporate IT organizations. Founded in 2003, we have built a reputation for rigorous, practitioner-taught courses that go beyond certification prep to deliver genuine, job-ready expertise.

Our instructors are working subject-matter experts — not career trainers — who bring real-world operational and government experience directly into every class. From Risk Management Framework (RMF) and cybersecurity operations to cloud architecture, Microsoft enterprise technologies, Cisco networking, and Linux administration, IT Dojo covers the full breadth of modern IT disciplines with depth that generic training providers simply cannot match.

All IT Dojo training is **100% instructor-led and live** — available as Live Remote Online (LRO) sessions or delivered on-site at your facility anywhere in the country. We do not offer self-paced or pre-recorded courses. Every student benefits from direct, real-time access to a knowledgeable instructor and the ability to ask questions, work through scenarios, and engage with the material in ways that recorded content cannot provide.

IT Dojo is a **B2B and B2G provider**. All training is employer-sponsored; we work directly with organizations and contracting offices to schedule, customize, and deliver training that aligns with mission requirements, workforce development plans, and DoD 8570/8140 compliance objectives.
