

Risk Management Framework Training Capabilities

IT Dojo has been delivering training to the DoD and Government community for over 22 years now. We endeavor to bring in the most up-to-date, dynamic training available to our clients at an affordable price.

IT Dojo's training staff, instructional designers, and consultants are leading experts in DoD and Federal government cybersecurity policy and compliance. Our goal is to provide customers with the most accurate and relevant knowledge in real-time, reflecting current DoD and Federal cybersecurity guidance.

Our team has decades of real-world cybersecurity experience in government service and as contractors. Staff qualifications include Ph.D., MBA, MIS, MS, CISSP, CAP, NQV3, CRISC, CISA, RDRP, PMP, ITIL-F, FITSP-M, FITSP-D, MCSE, and MCT.

IT Dojo aims to deliver efficient cybersecurity training, enabling students to confidently fulfill their RMF responsibilities. We created training programs for the DoD Information Assurance Certification and Accreditation Process (DIACAP) and the Federal Information Security Management Act (FISMA), now unified under the Risk Management Framework (RMF) to meet current cybersecurity needs.
